Senior Secondary Education, May 2016

SKILLS

- Reactjs
- Nodejs
- MongoDB
- Javascript
- MySQL
- Firebase
- C++
- HTML
- CSS
- User Experience
- Bootstrap
- PHP
- Python
- Machine Learning
- Git

EXPERIENCE:

Meet.Me - Appointment Scheduler Webapp
Frontend Developer Freelance (October 2019 - November 2019)

- Created web pages for an appointment scheduler app using HTML, CSS, Javascript, jquery

Farmistan - An e-commerce platform for a farm
Web Design and Development Project (ongoing)

- Goal was to create a platform that allows the farm owner to easily upload the goods coming from different farmers, and the user can easily find what they are looking for from a specific farmer. Worked in a team of 3, I designed the entire user experience and the interface.

PROJECTS:

Sanidhya- online platform to help missing children reunite with their parents.

- Worked with a team of three to create an MVP for a hackathon using React-Native and Nodejs
- Implemented features like face-recogntion using an API.

Analysing Selfies and Predecting Selfie Deaths

- Worked with a team of three and under the supervision of Mrs. Somya Jain(Assistant Professor)
- Used Deep Learning (CNN) and Machine Learning(Text Analysis - NLP) to analyse the selfies, and classify them as dangerous or non-dangeorus. Also told about the elements that made that selfie dangerous. Frontend was developed using React, and Flask was for the backend.
