- Researching datasets,web scraping and preparing the data to turn the regression analysis on forming a Cricket dataset

MACHINE LEARNING AND NATURAL LANGUAGE PROCESSING(17B1NCI731)

MACHINE LEARNING AND DATA MINING(17M11CS112)

ELEMENTS OF STATISTICAL LEARNING(19B12MA411)

COMPUTING FOR DATA SCIENCE(19B12CS423)

- Two - Level Stress Analysis model for Organisations
Applying model on Facial Expression Recognition dataset was able to serve as an outcome of stress with a training accuracy of 79.93%.
Digital: Able to detect stress level in real time.
Analytical tool: Python
Module gained: Convolution neural network and Long short term memory algorithm.

Personalized Heart monitoring and reporting system

Research paper on process of publishing in IEEE at INBUSH 2020 conference.

Digital: Designed website.

Analytical Tools: Shiny R,Parse server,HTML,CSS,JAVASCRIPT

Module gained: Gradient boosting machine.

My Tech Lab

- C++
- MYSQL
- Python
- Machine Learning
- HTML
- CSS

I Am Green Blooded because...

In daily life, we never know where our flies. Management of time is important , Time is precious we all know but managing that time well is extremely important. If I want to finalise something I schedule my sitting time and write down my aim, expected result and time that will be invested in it And do something each day to accomplish it. I believe it's hardwork and determination which bring us what we want.
