

Location: Irving, TX

Description: Our client is currently seeking a Data Scientist

This job will have the following responsibilities:

- Design, develop, test, validate, and deploy Predictive Analytics/Machine Learning (ML) /Statistical models as part of new product development and/or projects.
- Work with stakeholders to identify the business requirements and the expected outcome
- Collaborate with subject matter experts to select the relevant sources of information and perform necessary data cleansing and ETL
- Work closely with senior data scientists and engineers to deploy models to production both in batch and real-time.
- Build data sets from multiple data sources and write data flows using Python and R, SQL/Spark.
- Use data visualization tools (e.g., Tableau, Kibana, Zeppelin) to share ongoing insights.
- Present findings to technical audiences.

Qualifications & Requirements:

- 1-2 years of industry experience in Data Science/Machine Learning developing, testing, validating, and/or deploying ML models with business impact
- 1-2 year's hands-on, industry experience with big data and programming languages such as e.g. Python, R, Scala
- 1-2 years' experience in data analysis using databases languages (e.g. SQL and Hive)
- Experience identifying data quality issues and working with data engineer to resolve issues
