Matriculate
Shiv Jyoti Convent School, Kota, Rajasthan
Cgpa - 9.8/10   2014

PROJECTS
Automatic accident avoidance and speed controller (2019)
An IoT project inspired from ACC technology to help driver, drive more efficiently using multiple sensors and avoid accidents. It uses an ultrasonic sensor to detect the distance from an obstacle and stops the vehicle before it hits the obstacle.

Crypto Currency Price Prediction (2019)
A machine learning project for the prediction of price of crypto currencies like bitcoin, ripple and ethereum. In this project we used various ML methods like SVR/SVM, Exponential Smoothing, XGBoost and compared the results from all the methods.

Created some responsive web pages (2018)
Some responsive web pages using HTML and CSS.
