OBJECTIVE

To keep growing myself both technically and as an individual. Develop a great sense of professionalism while utilising and advancing my technical skills and ability to support the organisation to achieve its objectives.

EDUCATION

Courses	Institution / School	Year of Passing	Percentage/CGPA
"Pursuing B.Tech" in Computer Science	Jaypee Institute of Information Technology	2021	7.3 (Till 6th Sem)
HSC	New Delhi COnvent School	2017	87%
SSC	Hariyana Vidya Mandir	2015	92%

PROJECT

Family Financial Management System — This Project was developed as a mini project in the beginning semesters with the help of data structures and Object Oriented Programming concepts. It basically involved management of transactions by each family member under a single platform.

Texture Classification using Wavelet Pooling — This was the minor project developed in the 5th semester. Objective was to classify images based on their textures with the help of wavelet pooling so as to combine both the spatial and spectral features of CNN to obtain an effective accuracy of the model.

SKILLS

MS Office
C, C++, Python (Basics)
SQL
HTML, JAVASCRIPT, CSS
Machine Learning (Basics)
Deep Learning (Basics)

LANGUAGES

English, Hindi

Customer Churn Prediction — This project was the training project on Machine Learning. The aim was to predict the propensity to churn for each customer. The project was developed keeping the different stages of the life cycle of Machine Learning into consideration.

INTERNSHIP

Summer Internship was done as a 6 week training on Machine Learning through Internshala. This training includes basics of Machine Learning life cycle , its working and various types of Machine learning algorithms.

EXTRA CURRICULAR ACTIVITIES

- Organised events for the music society of JIIT i.e. Fortissimo as a member of the society and a guitarist.
- Volunteered for the literary society in the annual fest of JIIT.
